LINE EXTENSION AND ADDITIONAL COST FOR INSTALLATION

When a water line must be extended to provide service to a lot, the BUILDER/OWNER is responsible for all costs of that extension. The installation fee of \$2,400.00 covers only the normal setting of the meter and hooking up to an existing line. The cost of any road boring, rock breaking, and street cutting/repair is an additional cost to the BUILDER/OWNER as well as the parts required to provide service to the meter. PWSD #1 utilizes local contractors for the required services if needed. All bills to the BUILDER/OWNER are based upon actual cost.

In situations where engineering of the line is required to bring service to property location, the process and cost will be discussed with customer before any work is started.

To provide service to your property the following costs are estimated, and we require a down payment of one half of the estimated cost. You will be billed for the balance of the costs.

Estimated cost of the extension: \_\_\_\_\_

Down payment received: \_\_\_\_\_
